

Got Cellulite?

CELLUMAGE™

Whether we like it or not, majority of women will develop cellulite at some point in their lives regardless of diet and exercise. There is help for those women that want to do something about it.

Offer your clients a non-invasive, pain-free treatment regimen that will help reduce the unwanted dimple appearance of cellulite and cottage cheese thighs, with no surgery and no downtime.

Help your clients feel better about themselves by improving their skin's appearance.

The Cellumage treatment combines gentle suctioning with one of three uniquely designed contoured attachments for an intense massage to treat problem areas. This technique works by stretching connective tissues and stimulating collagen production resulting in a smoother, more toned body.

Incorporate the Cellumage treatment into your practice today by simply purchasing the low-cost Cellumage starter kit. The kit easily attaches to the vacuum supply of your Portapeel microdermabrasion system or most other microdermabrasion systems on the market.

Start offering your clients the benefits of a Cellumage treatment, without the inconvenience of additional high-cost, bulky equipment.
